

Herbarium DNA degradation: falling to pieces non-randomly
Freek T. Bakker and Lia Hemerik

ESM Fig. 2

ESM Fig. 2: Over-representation of A and G nucleotides at fragment endings, for fresh, young and old *Lactuca* herbarium DNA; fragment is indicated by grey lines. 'Frequency' indicates occurrence of that nucleotide at that position, across all reads, mapped to merged fragments; mapping was performed using Map Damage 2.0 (Jónsson et al. 2013).
